(b) Basis of presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles (“U.S. GAAP”). Certain information and footnote disclosures normally included in financial statements prepared in accordance with U.S. GAAP have been condensed or omitted as permitted by rules and regulations of the U.S. Securities and Exchange Commission (“SEC”). The condensed consolidated balance sheet as of March 31, 2013 was derived from the audited consolidated financial statements of the Company. The accompanying unaudited condensed consolidated financial statements should be read in conjunction with the March 31, 2013 audited consolidated financial statements of the Company included in the Company’s annual report on Form 20-F for the year ended March 31, 2013.

In the opinion of management, all adjustments (which include normal recurring adjustments) necessary to present a fair statement of the financial position as of September 30, 2013, and the results of operations for the three and six months ended September 30, 2013 and 2012 and cash flows for the six months ended September 30, 2013 and 2012 have been made.

Actual results could differ from those estimates. Significant items subject to such estimates and assumptions include the estimation of direct costs for the provision of donated cord blood for transplantation and research, the useful lives of property, plant and equipment and intangible assets, the recoverability of the carrying values of property, plant and equipment and intangible assets, the fair value of investment securities, the valuation allowances for receivables and deferred tax assets and the realizability of inventories.

(“Beijing Jiachenhong”) which are 24% and 25% for calendar years 2011 and 2012 onwards, respectively. In February 2012, Beijing Jiachenhong received approval from the tax authority on the renewal of its “High and New Technology Enterprise” (“HNTE”) status which entitled it to the preferential income tax rate of 15% effective retroactively from January 1, 2011 to December 31, 2013.

In June 2011, Guangzhou Nuoya received approval from the tax authority that it qualified as a HNTE which entitled it to the preferential income tax rate of 15% effective retrospectively from January 1, 2010 to December 31, 2012. Upon the expiration of the HNTE certificate, the tax rate applied to Guangzhou Nuoya would be 25% unless the HNTE status is renewed, which will enable it to preferential income tax rate of 15% from January 1, 2013 to December 31, 2015. For the period from January 1, 2013 to September 30, 2013, the Company has prepaid income tax at the rate of 25%. Management believes that Guangzhou Nuoya meets all the criteria for the renewal of HNTE status and accordingly, applied 15% tax rate to measure taxable temporary differences that are expected to reverse by the calendar year ending December 31, 2015.

The Company’s effective income tax rates for the three months ended September 30, 2012 and 2013 were 23.6% and 44.1%, and were 19.5% and 34.9% for the six months ended September 30, 2012 and 2013, respectively. The effective income tax rates for the three and six months ended September 30, 2013 differ from the PRC statutory income tax rate of 25% primarily due to the effect of Beijing Jiachenhong and Guangzhou Nuoya’s preferential tax treatments, which is offset by the effect of non-PRC entities not being subject to income tax.

As of and for the six months ended September 30, 2013, the Company did not have any material unrecognized tax benefits and thus no interest and penalties related to unrecognized tax benefits were recorded. In addition, the Company does not expect that the amount of unrecognized tax benefits will change significantly within the next twelve months.

Notes:

- (i) The KKR Notes and GM Notes provide KKRCHIL and GMHL with the ability to participate in any excess cash dividend. Excess cash dividend means any cash dividend to holders of shares that, together with all other cash dividends previously paid to holders of shares in the same financial year, exceeds, on a per share basis, an amount equal to the interest that has accrued and shall accrue at 7% coupon interest rate in such financial year divided by the number of shares into which the note is convertible at the conversion price then in effect on the relevant record date. Therefore, net income attributable to the Company is reduced by such allocated earnings to participating convertible notes for each reporting period in both basic and diluted net income per share computation.

- (ii) During the three and six months ended September 30, 2012 and 2013, the Company had potentially dilutive ordinary shares of 22,903,454 and 40,521,495 representing shares issuable upon conversion of the Notes (see Note 5), respectively. Such potentially dilutive ordinary shares were excluded from diluted net income per share computation because their effects would have been anti-dilutive.
